RWE Clean Energy honored with Connecticut Green Bank Award

- **Company recognized as Early Adopter in Energy Storage Solutions**
- **Green Bank Award recognizes companies advancing green energy in Connecticut**

VALHALLA, New York, May 17, 2023

RWE Clean Energy, a top-five renewable energy company in the U.S., has been recognized with a 2022 Connecticut Green Bank Award for being an Early Adopter of Energy Storage Solutions. The Connecticut Green Bank established the Green Bank Awards to honor companies advancing the green energy movement and helping bring resilience, health, and equity to Connecticut.

“We are grateful to Connecticut Green Bank for their recognition of our work helping customers adopt clean energy technologies,” said Mark Noyes, CEO of RWE Clean Energy. “Our company is committed to being a preeminent clean energy player with an ambition to grow wind, solar and battery storage solutions across the U.S.”

Connecticut Green Bank has honored RWE Clean Energy for being among the first companies to have projects installed and dispatching within the Energy Storage Solutions program. The program incentivizes Connecticut customers to install batteries in their homes and businesses, helping them be more energy secure in the face of climate change. RWE applied for and has been awarded permission to pursue the development of up to 10 MW of battery storage systems for the program and plans to continue its effort to further expand energy storage more widely.

RWE Clean Energy operates a portfolio of 8 GW of renewable energy projects, with the capacity to power more than 2 million U.S. households, and has a development platform of more than 24 GW, one of the largest in the U.S. The U.S. is a key market in RWE’s growth strategy ‘Growing Green’ to expand its renewables business and become carbon neutral by 2040.

RWE Clean Energy

RWE Clean Energy, a subsidiary of RWE Group, is a top-tier renewable energy company in the United States. With more than 15 years in the U.S. renewables business, the company has an outstanding track record in developing, constructing and operating renewable energy facilities. The 1500-person RWE team in the U.S. is fully committed to forging ahead with the clean energy transition in North America. RWE Clean Energy operates a renewable energy portfolio of about 8 gigawatts (GW) installed capacity of onshore wind, solar, and battery storage, making it the number four renewable energy company in the U.S. and the country's second largest solar owner and operator, present in the majority of U.S. states. As part of the RWE Group's Growing Green strategy to expand globally its green portfolio to more than 50 GW of installed capacity and to invest globally more than EUR 50 billion gross by 2030, RWE Clean Energy is determined to significantly increase its operating asset base in the U.S. This is backed by a project pipeline of more than 24 GW in onshore wind, solar and battery storage which provides for one of the largest development platforms in the United States. RWE Clean Energy's strong position in renewable energy is a result of combining RWE Renewables Americas with Con Edison Clean Energy Businesses, acquired by RWE in March 2023.
