RWE selected by U.S. Department of Energy to help improve efficiency and sustainability in federal facilities

- **Contracts competitively awarded to 20 energy service companies (ESCOs) to provide Energy Savings Performance Contracts (ESPCs) for federal agencies**
- **Program helps federal agencies achieve Biden Administration efficiency and decarbonization goals**
- **Awards this year mark 25th anniversary of program with first contracts awarded in 1998**

AUSTIN, Texas, August 15, 2023

RWE, a leading renewable energy company, has been selected by the U.S. Department of Energy as one of just 20 energy service companies (ESCOs) to provide Energy Savings Performance Contracts (ESPCs) for federal agencies.

The program, now in its 25th year, is a way for the government to leverage private capital to improve the efficiency and sustainability of federal facilities.

“We’re extremely honored to be chosen as a trusted partner by the Department of Energy to develop innovative solutions and drive technological progress for federal facilities,” said Mark Noyes, CEO of RWE Clean Energy, a subsidiary of RWE AG. “As we continue to expand our portfolio of renewable energy projects in the U.S., we’re happy to bring our customers along with us on our path to a sustainable future.”

Energy Savings Performance Contracts allow federal agencies to accomplish energy savings projects without special Congressional appropriations. As a designated ESCO, RWE will conduct a comprehensive energy audit and identify improvements to save energy, generating cost savings sufficient to pay for the project over the term of the contract.

RWE Clean Energy operates a renewable energy portfolio of about 8 gigawatts installed capacity, making it the number four renewable energy company in the U.S., and the second largest solar owner and operator in the U.S. RWE Clean Energy’s strong position in renewable energy is a result of combining RWE Renewables Americas with Con Edison Clean Energy Businesses, acquired by RWE in March 2023.

RWE Clean Energy

RWE Clean Energy, a subsidiary of RWE Group, is a top-tier renewable energy company in the United States. With more than 15 years in the U.S. renewables business, the company has an outstanding track record in developing, constructing and operating renewable energy facilities. The 1500-person RWE team in the U.S. is fully committed to forging ahead with the clean energy transition in North America. RWE Clean Energy operates a renewable energy portfolio of about 8 gigawatts (GW) installed capacity of onshore wind, solar, and battery storage, making it the number four renewable energy company in the U.S. and the country's second largest solar owner and operator, present in the majority of U.S. states. As part of the RWE Group's Growing Green strategy to expand globally its green portfolio to more than 50 GW of installed capacity and to invest globally more than EUR 50 billion gross by 2030, RWE Clean Energy is determined to significantly increase its operating asset base in the U.S. This is backed by a project pipeline of more than 24 GW in onshore wind, solar and battery storage which provides for one of the largest development platforms in the United States. RWE Clean Energy's strong position in renewable energy is a result of combining RWE Renewables Americas with Con Edison Clean Energy Businesses, acquired by RWE in March 2023.
