RWE Americas Announces Executive Leadership Promotions

Promotions support continued growth and operational excellence for the business

Austin, September 24, 2026

RWE today announced the promotions of Corey Hopper and Tim Nelson to executive vice president roles, recognizing their significant contributions to the company's growth and execution success. This move reinforces the strength of the company's leadership team as RWE continues to expand its portfolio in the U.S.

"These promotions recognize two outstanding leaders whose expertise, commitment and results have helped shape RWE's success and who will continue to play a critical role in guiding the growth of our business," said Andrew Flanagan, chief executive officer, RWE Americas. "Corey and Tim have made significant contributions to their respective organizations and earned the trust and respect of colleagues across the company."

Corey Hopper, executive vice president, Execution & Program Management will continue to lead preconstruction, project execution, supply chain planning and logistics, quality assurance and quality control (QA/QC), operational excellence, project controls, and estimating functions. His organization plays a critical role managing RWE's development pipeline and leading execution across the portfolio. Under his leadership, the organization commissioned 2 gigawatts (GW) of operating capacity in 2025, the second most across all U.S. renewables developers.

As executive vice president, Operations, Tim Nelson will continue to lead operations; health, safety, security and environmental (HSSE); asset management; generation services; and operations engineering teams. His organization supports approximately 130 utility-scale facilities and is responsible for the safe, reliable and profitable operation of RWE Americas' more than 13 GW operated portfolio of wind, solar and battery storage assets.

Announced in March, RWE Americas plans to add 9 GW of net new capacity by 2031 to support America's growing power needs. As members of RWE Americas' Executive Committee, Hopper and Nelson will continue to play key leadership roles in executing that strategy and positioning RWE for continued growth across the U.S.

RWE Americas

RWE Americas, a subsidiary of RWE, is a US-based energy company that is helping to meet the growing demand for energy across the United States. Backed by RWE's 125-year global legacy of managing diverse power assets, RWE Americas operates over 13 GW of power projects across 27 states. With a talented workforce of 2,000 employees, RWE Americas develops, constructs and operates wind, solar and battery storage projects, along with natural gas-powered generation, that safely deliver affordable, reliable electricity to our customers. Committed to responsible development, RWE Americas invests in local
