

## Cassadaga Wind Project

Case No. 14-F-0490

1001.39 Exhibit 39

## Wastewater Interconnection

## EXHIBIT 39 WASTEWATER INTERCONNECTION

The proposed Facility is not expected to require wastewater interconnection, and as such, the requirements of this exhibit are not applicable. Specific to the O&M building, if a new building is constructed wastewater needs will be satisfied through use of an individual on-site wastewater treatment system (e.g., septic system). The Applicant will work with the Chautauqua County Department of Health throughout this process. If an existing building is used for O&M purposes, the Applicant will evaluate the adequacy of existing wastewater treatment systems.
